Why are flu shots important? 2018-2019 stats

- 670,000 people were hospitalized with flu-related complications
- 5-10% of those hospitalized = children <5 yrs.
- Flu related deaths:
 - 36,000 – 61,200 from the flu complications
 - 2017-18 172 were children 80% unvaccinated (final 18-19 stats unavailable)

Who should receive a flu shot?

- Everyone 6 months or older
- People at high risk for serious flu complications
- This includes young children, pregnant women
- Those with chronic medical conditions
- Anyone who wants protection against the flu
- Those caring for immunocompromised persons
